Better birdwatching in the Cape Peninsula

Cape Peninsula Birdlife breaks new ground: it provides residents of, and visitors to, the Cape Peninsula with information where particular birds may be found, and why and how they occur where they do. Superbly illustrated with photographs by some of South Africa's premier photographers, readers will gain an appreciation of the extraordinarily rich natural history of the Cape Peninsula.

- more than 80 bird species
- over 200 colour photographs
- 18 bird routes
- night birds
- easy cross referencing
- fits in pocket/rucksack

Roy Siegfried is a scientist whose popular books and magazine articles have contributed to not only aiding the general reader's understanding of technical subjects, but also explaining why and how science adapts to changing circumstances.

Ian Sinclair is recognised as one of Africa's foremost field birders and has travelled extensively across the African continent for over 35 years, leading many expeditions to find and research birds.
